

**SONICSHARES™ AIRLINES, HOTELS, CRUISE LINES ETF (TRYP) (THE “FUND”)**

---

**Supplement dated July 13, 2022  
to the Summary Prospectus and Prospectus dated May 11, 2021, and the Statement of Additional  
Information (“SAI”) dated May 11, 2021, as previously supplemented**

---

Shares of the Fund will cease trading on the NYSE Arca, Inc. (“NYSE”) and will be closed to purchase by investors as of the close of regular trading on the NYSE on **July 22, 2022** (the “Closing Date”). The Fund will not accept purchase orders after the Closing Date.

Shareholders may sell their holdings in the Fund prior to the Closing Date and customary brokerage charges may apply to these transactions. However, from July 22, 2022 through **July 29, 2022** (the “Liquidation Date”), shareholders may be able to sell their shares only to certain broker-dealers and there is no assurance that there will be a market for the Fund’s shares during this time period. Between the Closing Date and the Liquidation Date, the Fund will be in the process of closing down and liquidating the Fund’s portfolio. This process will result in the Fund increasing its cash holdings and, as a consequence, not tracking its underlying index, which is inconsistent with the Fund’s investment objective and strategy.

On or about the Liquidation Date, the Fund will liquidate its assets and distribute cash pro rata to all shareholders of record who have not previously redeemed or sold their shares, subject to any required withholding. Liquidation proceeds paid to shareholders generally should be treated as received in exchange for shares and will therefore be treated as a taxable event giving rise to a capital gain or loss depending on a shareholder’s tax basis. Shareholders should contact their tax adviser to discuss the income tax consequences of the liquidation. In addition, these payments to shareholders may include distributions of accrued capital gains and dividends. Once the distributions are complete, the Fund will terminate.

Toroso Investments LLC (“Toroso”), the Fund’s investment adviser, informed the Board of Trustees (the “Board”) of Tidal ETF Trust of its view that the Fund could not conduct its business and operations in an economically efficient manner over the long term and recommended the Fund’s closure and liquidation to the Board. The Board determined, after considering Toroso’s recommendation, that it is in the best interests of the Fund and its shareholders to liquidate and terminate the Fund as described above.

## TABLE OF CONTENTS

<b>SonicShares™ Airlines, Hotels, Cruise Lines ETF - Fund Summary</b> .....	<b>1</b>
<b>Additional Information about the Fund</b> .....	<b>8</b>
<b>Portfolio Holdings Information</b> .....	<b>13</b>
<b>Management</b> .....	<b>13</b>
<b>How to Buy and Sell Shares</b> .....	<b>14</b>
<b>Dividends, Distributions, and Taxes</b> .....	<b>15</b>
<b>Distribution</b> .....	<b>18</b>
<b>Premium/Discount Information</b> .....	<b>18</b>
<b>Additional Notices</b> .....	<b>18</b>
<b>Financial Highlights</b> .....	<b>18</b>

**Investment Objective**

The SonicShares™ Airlines, Hotels, Cruise Lines ETF (the “Fund”) seeks to track the performance, before fees and expenses, of the Solactive Airlines, Hotels, Cruise Lines Index (the “Index”).

**Fees and Expenses of the Fund**

This table describes the fees and expenses that you may pay if you buy, hold, and sell shares of the Fund (“Shares”). You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the table and example below.

<b>Annual Fund Operating Expenses</b> (expenses that you pay each year as a percentage of the value of your investment)	
Management Fees	0.75%
Distribution and/or Service (12b-1) Fees	0.00%
Other Expenses <sup>1</sup>	0.00%
<b>Total Annual Fund Operating Expenses</b>	<b>0.75%</b>

<sup>1</sup> Estimated for the current fiscal year.

**Expense Example**

This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other funds. The Example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your Shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and that the Fund’s operating expenses remain the same. The Example does not take into account brokerage commissions that you may pay on your purchases and sales of Shares. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

<b>1 Year</b>	<b>3 Years</b>
\$77	\$240

**Portfolio Turnover**

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Shares are held in a taxable account. These costs, which are not reflected in total annual fund operating expenses or in the expense example above, affect the Fund’s performance. Because the Fund is newly organized, portfolio turnover information is not yet available.

**Principal Investment Strategies**

The Fund uses a “passive management” (or indexing) approach to track the performance, before fees and expenses, of the Index. The Index was developed in 2021 and is administered by Solactive AG (the “Index Provider”).

*Solactive Airlines, Hotels, Cruise Lines Index*

The Index is a rules-based index that seeks to provide exposure to a global portfolio of companies identified as being in the (i) airline industry, (ii) hotel industry, and (iii) the cruise line industry, as described in more detail below.

The Index’s initial investable universe consists of equity securities and depositary receipts (including American Depositary Receipts (“ADRs”) and Global Depositary Receipts (“GDRs”)) of companies listed on exchanges in Australia, Brazil, Canada, Hong Kong, Israel, Japan, Mexico, New Zealand, Republic of South Korea, Singapore, Switzerland, United Kingdom, United States of America, or any member country of the European Union. To qualify for inclusion in the Index, companies must have a minimum market capitalization of \$2 billion and a minimum three-month average daily traded volume of \$1 million.

To qualify for inclusion in the Index, companies must also meet at least one of the criteria below:

- Companies that derive at least 50% of their revenue from owning or leasing aircraft for operating passenger air transportation services (“Airline Companies”);
- Companies that derive at least 50% of their revenue from managing, franchising, owning, selling, or leasing hotels and leisure properties, and are structured as either operating companies or real estate investment trusts (“REITS”) (“Hotel Companies”); or
- Companies that derive at least 50% of their revenue from owning or leasing ships for the purposes of managing and operating cruise vacation services for passengers (“Cruise Line Companies”).

If a company derives more than 50% of its revenue from two or three of those business categories, then that company is designated to the category from which it derives its greatest revenue.

Companies meeting the foregoing revenue criteria are classified within the FactSet Revere Business and Industry Classification System (“RBICS”) as follows:

<b>Index Category</b>	<b>RBICS Categories</b>
<i>Airline Companies</i>	Asia/Pacific Air Passenger Service Providers; United States Air Passenger Service Providers; Europe Air Passenger Service Providers; or Multi-Region Air Passenger Transportation
<i>Hotel Companies</i>	Budget Hotels and Motels; Full Service Hotels and Resorts; Hotel and Motel Equity REITs; Luxury Hotels and Resorts; Mixed-Type Hotels, Motels and Resorts; Tour Operators; or Vacation Ownership Operators
<i>Cruise Line Companies</i>	Ocean-Going Cruise Lines

The Index is reconstituted three Thursdays prior to the third Friday of June and of December (or the next business day if this falls on a non-business day) (the “Selection Day”) and adjustments are made on the third Friday of June and of December (or the next business day if this falls on a non-business day). At the time of each reconstitution, the Index components are weighted subject to the following parameters, depending upon a company’s market capitalization:

- Airline Companies - 4.5% allocation to each of the top three Airline Companies in the Index with the largest market capitalization;
- Hotel Companies - 4.5% allocation to each of the top three Hotel Companies in the Index with the largest market capitalization;
- Cruise Line Companies - 4.5% allocation to each of the top three Cruise Line Companies in the Index with the largest market capitalization; and
- Remaining Index components are weighted based on market capitalization subject to a cap of 4%.

The weights of the Index components are determined on the Selection Day and such weights float with the price of the components from the Selection Day forward until the next Selection Day.

An Index component will be removed from the Index if, on Selection Day, it does not have a market capitalization of at least \$1 billion.

As of May 3, 2021, the Index was comprised of 61 components.

#### *The Fund’s Investment Strategy*

The Fund will invest all, or substantially all, of its assets in the component securities that make up the Index.

Under normal circumstances, at least 80% of the Fund’s net assets, plus borrowings for investment purposes, will be invested in Airline Companies, Hotel Companies or Cruise Line Companies, as defined above.

The Fund will concentrate its investments in a particular industry or group of industries (i.e., hold more than 25% of its total assets in the securities of a particular industry or group of related industries), to approximately the same extent as the Index is so concentrated.

The Fund will generally use a “replication” strategy to achieve its investment objective, meaning it generally will invest in all of the component securities of the Index. However, the Fund may use a “representative sampling” strategy, meaning it may invest in a sample of the securities in the Index whose risk, return and other characteristics closely resemble the risk, return and other characteristics of the Index as a whole, when the Fund’s adviser believes it is in the best interests of the Fund (e.g., when replicating the Index involves practical difficulties or substantial costs, an Index component becomes temporarily

illiquid, unavailable, or less liquid, or as a result of legal restrictions or limitations that apply to the Fund but not to the Index).

The Fund also may invest in securities or other investments not included in the Index, but which the Fund's adviser believes will help the Fund track the Index. For example, the Fund may invest in securities that are not components of the Index to reflect various corporate actions and other changes to the Index (such as reconstitutions, additions, and deletions).

The Fund is deemed to be non-diversified under the Investment Company Act of 1940, as amended (the "1940 Act"), which means that it may invest a greater percentage of its assets in the securities of a single issuer or a smaller number of issuers than if it was a diversified fund.

### **Principal Investment Risks**

The principal risks of investing in the Fund are summarized below. As with any investment, there is a risk that you could lose all or a portion of your investment in the Fund. Some or all of these risks may adversely affect the Fund's net asset value per share ("NAV"), trading price, yield, total return and/or ability to meet its objective. For more information about the risks of investing in the Fund, see the section in the Fund's Prospectus titled "Additional Information About the Fund—Principal Risks of Investing in the Fund."

The principal risks are presented in alphabetical order to facilitate finding particular risks and comparing them with those of other funds. Each risk summarized below is considered a "principal risk" of investing in the Fund, regardless of the order in which they appear.

### **Airlines, Hotels and Cruise Lines Industry Risks:**

- *Airline Companies Risk.* Airline Companies may be adversely affected by a downturn in economic conditions. Due to the discretionary nature of business and leisure travel spending, coupled with the high debt and cost structure of the airline industry, a downturn in economic conditions of the U.S. economy and economies in other regions of the world that results in decreased demand for air travel may significantly and negatively affect the revenues and profitability of such industry. Airline Companies may also be significantly affected by changes in fuel prices, which may be very volatile. Due to the competitive nature of this industry, such companies may not be able to pass on increased fuel prices to customers by increasing fares. Airline Companies may also be significantly affected by the imposition of tariffs and/or changes in labor relations, insurance costs, and the imposition by the United States or other countries of taxes, tariffs or regulations applicable to airline travel, aircraft manufacturing, or aircraft sales. The trend in the United States has been to deregulate the transportation industry, which could have a favorable long-term effect, but future government decisions could adversely affect companies in this industry. Airline Companies may also be highly dependent on aircraft or related equipment from a small number of suppliers, and consequently, issues affecting the availability, reliability, safety, or longevity of such aircraft or equipment (e.g., the inability of a supplier to meet aircraft demand or the grounding of an aircraft due to safety concerns) may have a significant effect on the operations and profitability of Airline Companies. Airline Companies are subject to various risks that may cause significant losses, which include risks related to uncertainty in travel (due to global, regional or local events), passenger safety, security, and privacy, changing consumer demands, shortages of experienced personnel, consumer perception of risk (for example, due to terrorist attacks, pandemics, and political or social violence), and changing or increased regulations.
- *Hotel Companies Risk.* Hotel Companies may be adversely affected by a downturn in economic conditions. Due to the discretionary nature of hotel spending, coupled with the high debt and cost structure of the hotel and lodging industry, a downturn in economic conditions of the U.S. economy and economies in other regions of the world that results in decreased demand for hotel accommodations may significantly and negatively affect the revenues and profitability of such industry. Hotel Companies may also be significantly affected by changes in labor relations, insurance costs, and the imposition of taxes, tariffs or regulations applicable to hospitality services and the purchase or sale of hotels or real estate. Companies in the hotel and lodging industry are subject to various risks that may cause significant losses, which includes risks related to uncertainty in travel (due to global, regional or local events), guest safety, security, and privacy, changing consumer demands, shortages of experienced personnel, consumer perception of risk (for example, due to terrorist attacks, pandemics, and political or social violence), and changing or increased regulations.
- *Cruise Line Companies Risk.* Cruise Line Companies may be adversely affected by a downturn in economic conditions. Due to the discretionary nature of leisure travel and cruise spending, coupled with the high debt and cost structure of the cruise line industry, a downturn in economic conditions of the U.S. economy and economies in other regions of the world that results in decreased demand for cruises may significantly and negatively affect the

revenues and profitability of such industry. Cruise Line Companies may also be significantly affected by changes in fuel prices, which may be very volatile. Due to the competitive nature of this industry, such companies may not be able to pass on increased fuel prices to customers by increasing fares. Cruise Line Companies may also be significantly affected by changes in labor relations, insurance costs, and the imposition by the United States or other countries of taxes, tariffs or regulations applicable to cruises, ship manufacturing or ship sales. Cruise Line Companies are subject to various risks that may cause significant losses, which includes risks related to uncertainty in travel (due to global, regional or local events), passenger safety, security, and privacy, changing consumer demands, shortages of experienced personnel, consumer perception of risk (for example, due to terrorist attacks, pandemics, and political or social violence), and changing or increased regulations.

**Concentration Risk.** The Fund's investments will be concentrated in an industry or group of industries to the extent the Index is so concentrated. In such event, the value of Shares may rise and fall more than the value of shares that invest in securities of companies in a broader range of industries.

**Depository Receipt Risk.** Depository receipts involve risks similar to those associated with investments in foreign securities and certain additional risks. Depository receipts listed on U.S. exchanges are issued by banks or trust companies, and entitle the holder to all dividends and capital gains that are paid out on the underlying foreign shares ("Underlying Shares"). When the Fund invests in depository receipts as a substitute for an investment directly in the Underlying Shares, the Fund is exposed to the risk that the depository receipts may not provide a return that corresponds precisely with that of the Underlying Shares.

**Equity Market Risk.** The equity securities held in the Fund's portfolio may experience sudden, unpredictable drops in value or long periods of decline in value. This may occur because of factors that affect securities markets generally or factors affecting specific issuers, industries, or sectors in which the Fund invests. Common stocks, such as those held by the Fund, are generally exposed to greater risk than other types of securities, such as preferred stock and debt obligations, because common stockholders generally have inferior rights to receive payment from issuers.

#### **ETF Risks**

- *Authorized Participants, Market Makers, and Liquidity Providers Concentration Risk.* The Fund has a limited number of financial institutions that are authorized to purchase and redeem Shares directly from the Fund (known as "Authorized Participants" or "APs"). In addition, there may be a limited number of market makers and/or liquidity providers in the marketplace. To the extent either of the following events occur, Shares may trade at a material discount to NAV and possibly face delisting: (i) APs exit the business or otherwise become unable to process creation and/or redemption orders and no other APs step forward to perform these services; or (ii) market makers and/or liquidity providers exit the business or significantly reduce their business activities and no other entities step forward to perform their functions.
- *Costs of Buying or Selling Shares.* Due to the costs of buying or selling Shares, including brokerage commissions imposed by brokers and bid-ask spreads, frequent trading of Shares may significantly reduce investment results and an investment in Shares may not be advisable for investors who anticipate regularly making small investments.
- *Shares May Trade at Prices Other Than NAV.* As with all ETFs, Shares may be bought and sold in the secondary market at market prices. Although it is expected that the market price of Shares will approximate the Fund's NAV, there may be times when the market price of Shares is more than the NAV intra-day (premium) or less than the NAV intra-day (discount) due to supply and demand of Shares or during periods of market volatility. This risk is heightened in times of market volatility, periods of steep market declines, and periods when there is limited trading activity for Shares in the secondary market, in which case such premiums or discounts may be significant. Because securities held by the Fund may trade on foreign exchanges that are closed when the Fund's primary listing exchange is open, the Fund is likely to experience premiums and discounts greater than those of ETFs holding only domestic securities.
- *Trading.* Although Shares are listed on a national securities exchange, such as NYSE Arca, Inc., (the "Exchange"), and may be traded on U.S. exchanges other than the Exchange, there can be no assurance that Shares will trade with any volume, or at all, on any stock exchange. In stressed market conditions, the liquidity of Shares may begin to mirror the liquidity of the Fund's underlying portfolio holdings, which can be significantly less liquid than Shares.

**Foreign Securities Risk.** Investments in securities or other instruments of non-U.S. issuers involve certain risks not involved in domestic investments and may experience more rapid and extreme changes in value than investments in securities of U.S. companies. Financial markets in foreign countries often are not as developed, efficient, or liquid as financial markets in the United States, and therefore, the prices of non-U.S. securities and instruments can be more volatile. In addition, the Fund will

be subject to risks associated with adverse political and economic developments in foreign countries, which may include the imposition of economic sanctions. Generally, there is less readily available and reliable information about non-U.S. issuers due to less rigorous disclosure or accounting standards and regulatory practices.

**General Market Risk.** Economies and financial markets throughout the world are becoming increasingly interconnected, which increases the likelihood that events or conditions in one country or region will adversely impact markets or issuers in other countries or regions. Securities in the Fund's portfolio may underperform in comparison to securities in the general financial markets, a particular financial market, or other asset classes, due to a number of factors, including inflation (or expectations for inflation), interest rates, global demand for particular products or resources, natural disasters or events, pandemic diseases, terrorism, regulatory events, and government controls.

**Index Risk.** The Index may not reflect all companies meeting the Index's eligibility criteria if certain characteristics of a company are not known at the time the Index is composed or reconstituted.

**Market Capitalization Risk.**

- *Large-Capitalization Investing.* The securities of large-capitalization companies may be relatively mature compared to smaller companies and therefore subject to slower growth during times of economic expansion. Large-capitalization companies may also be unable to respond quickly to new competitive challenges, such as changes in technology and consumer tastes.
- *Mid-Capitalization Investing.* The securities of mid-capitalization companies may be more vulnerable to adverse issuer, market, political, or economic developments than securities of large-capitalization companies. The securities of mid-capitalization companies generally trade in lower volumes and are subject to greater and more unpredictable price changes than large-capitalization stocks or the stock market as a whole.
- *Small-Capitalization Investing.* The securities of small-capitalization companies may be more vulnerable to adverse issuer, market, political, or economic developments than securities of large- or mid-capitalization companies. The securities of small-capitalization companies generally trade in lower volumes and are subject to greater and more unpredictable price changes than large- or mid-capitalization stocks or the stock market as a whole. There is typically less publicly available information concerning smaller-capitalization companies than for larger, more established companies.

**New Fund Risk.** The Fund is a recently organized management investment company with no operating history. As a result, prospective investors do not have a track record or history on which to base their investment decisions.

**Non-Diversification Risk.** Because the Fund is "non-diversified," it may invest a greater percentage of its assets in the securities of a single issuer or a smaller number of issuers than if it was a diversified fund. As a result, a decline in the value of an investment in a single issuer or a smaller number of issuers could cause the Fund's overall value to decline to a greater degree than if the Fund held a more diversified portfolio.

**Pandemic Risk.** Beginning in the first quarter of 2020, the United States and countries around the world experienced a global pandemic caused by COVID-19, a novel coronavirus. The pandemic resulted in a wide range of social and economic disruptions, including closed borders and reduced or prohibited domestic or international travel. Some sectors of the economy and individual issuers, including Airline Companies, Cruise Line Companies and Hotel Companies, experienced particularly large losses. Travel restrictions imposed in the United States and other countries have resulted in Airline Companies, Cruise Line Companies and Hotel Companies seeing dramatically reduced demand and, consequently, an equally dramatic impact to such companies' operations and profitability.

**Passive Investment Risk.** The Fund invests in the securities included in, or representative of, its Index regardless of their investment merit. The Fund does not attempt to outperform its Index or take defensive positions in declining markets. As a result, the Fund's performance may be adversely affected by a general decline in the market segments relating to its Index.

**Recent Market Events Risk.** U.S. and international markets have experienced significant periods of volatility in recent years and months due to a number of economic, political and global macro factors including the impact of COVID-19 as a global pandemic, which has resulted in public health issues, growth concerns in the U.S. and overseas, layoffs, rising unemployment claims, changed travel and social behaviors, and reduced consumer spending. The effects of COVID-19 may lead to a substantial economic downturn or recession in the U.S. and global economies, the recovery from which is uncertain and may last for an extended period of time. These developments as well as other events could result in further market volatility and negatively affect financial asset prices, the liquidity of certain securities and the normal operations of securities exchanges and other markets.

**REIT Risk.** A REIT is a company that owns or finances income-producing real estate. Through its investments in REITs, the Fund is subject to the risks of investing in the real estate market, including decreases in property revenues, increases in interest rates, increases in property taxes and operating expenses, legal and regulatory changes, a lack of credit or capital, defaults by borrowers or tenants, environmental problems and natural disasters. REITs are subject to additional risks, including those related to adverse governmental actions; declines in property value and the real estate market; the potential failure to qualify for tax-free pass through of income; and exemption from registration as an investment company. REITs are dependent upon specialized management skills and may invest in relatively few properties, a small geographic area, or a small number of property types. As a result, investments in REITs may be volatile. To the extent the Fund invests in REITs concentrated in specific geographic areas or property types, the Fund may be subject to a greater loss as a result of adverse developments affecting such area or property types. REITs are pooled investment vehicles with their own fees and expenses and the Fund will indirectly bear a proportionate share of those fees and expenses.

**Sector Risk.** The prices of securities of issuers in a particular sector may be more susceptible to fluctuations due to changes in economic or business conditions, government regulations, availability of basic resources or supplies, or other events that affect sector or industries within the sector more than securities of issuers in other sectors. The value of the Fund's investments may fluctuate in response to events affecting a particular sector or industry within the sector.

- *Industrials Sector Risk.* Airline Companies are included within the industrials sector. The performance of the Fund could be negatively impacted by events affecting this sector. The industrials sector may be affected by changes in the supply of and demand for products and services, product obsolescence, claims for environmental damage or product liability and general economic conditions, among other factors. Specific industry risks impacting Airline Companies are set forth in "Airline Companies Risk" above.
- *Consumer Discretionary Sector Risk.* Hotel Companies and Cruise Line Companies are included within the consumer discretionary sector. The performance of the Fund could be negatively impacted by events affecting this sector. The success of consumer product manufacturers and retailers (including travel and leisure) is tied closely to the performance of domestic and international economies, interest rates, exchange rates, competition, consumer confidence, changes in demographics and consumer preferences. Companies in the consumer discretionary sector depend heavily on disposable household income and consumer spending, and may be strongly affected by social trends and marketing campaigns. These companies may be subject to severe competition, which may have an adverse impact on their profitability. Specific industry risks impacting Hotel Companies and Cruise Line Companies are set forth in "Hotel Companies Risk" and "Cruise Line Companies Risk" above.

**Third Party Data Risk.** The composition of the Index, and consequently the Fund's portfolio, is heavily dependent on information and data calculated and published by an independent third party calculation agent ("Third Party Data"). When Third Party Data proves to be incorrect or incomplete, any decisions made in reliance thereon may lead to the inclusion or exclusion of securities from the Index that would have been excluded or included had the Third Party Data been correct and complete. If the composition of the Index reflects such errors, the Fund's portfolio can also be expected to reflect the errors.

**Tracking Error Risk.** As with all index funds, the performance of the Fund and its Index may differ from each other for a variety of reasons. For example, the Fund incurs operating expenses and portfolio transaction costs not incurred by the Index. In addition, the Fund may not be fully invested in the securities of the Index at all times or may hold securities not included in the Index.

**Underlying Index Risk.** Neither the Fund's investment adviser nor the Index Provider is able to guarantee the continuous availability or timeliness of the production of the Index. The calculation and dissemination of the Index values may be delayed if the information technology or other facilities of the Index Provider, calculation agent, data providers and/or relevant stock exchange malfunction for any reason. A significant delay may cause trading in shares of the Fund to be suspended. Errors in Index data, computation and/or the construction in accordance with its methodology may occur from time to time and may not be identified and corrected by the Index Provider, calculation agent or other applicable party for a period of time or at all, which may have an adverse impact on the Fund and its shareholders.

## **Performance**

Performance information for the Fund is not included because the Fund has not completed a full calendar year of operations as of the date of this Prospectus. When such information is included, this section will provide some indication of the risks of investing in the Fund by showing changes in the Fund's performance history from year to year and showing how the Fund's average annual total returns compare with those of the Index and a broad measure of market performance. Although past performance of the Fund is no guarantee of how it will perform in the future, historical performance may give you some indication of the risks of investing in the Fund. Updated performance information will be available on the Fund's website at [www.sonicshares.com](http://www.sonicshares.com).

## **Management**

### *Investment Adviser*

Toroso Investments, LLC (“Toroso” or the “Adviser”) serves as investment adviser to the Fund.

### *Portfolio Managers*

Michael Venuto, Chief Investment Officer for the Adviser, is primarily responsible for the day-to-day management of the Fund’s portfolio and has been a portfolio manager of the Fund since its inception in May 2021.

Charles A. Ragauss, CFA, Portfolio Manager for the Adviser, is primarily responsible for the day-to-day management of the Fund’s portfolio and has been a portfolio manager of the Fund since its inception in May 2021.

## **Purchase and Sale of Shares**

The Fund issues and redeems Shares at NAV only in large blocks known as “Creation Units,” which only APs (typically, broker-dealers) may purchase or redeem. The Fund generally issues and redeems Creation Units in exchange for a portfolio of securities (the “Deposit Securities”) and/or a designated amount of U.S. cash.

Shares are listed on a national securities exchange, such as the Exchange, and individual Shares may only be bought and sold in the secondary market through brokers at market prices, rather than NAV. Because Shares trade at market prices rather than NAV, Shares may trade at a price greater than NAV (premium) or less than NAV (discount).

An investor may incur costs attributable to the difference between the highest price a buyer is willing to pay to purchase Shares (the “bid” price) and the lowest price a seller is willing to accept for Shares (the “ask” price) when buying or selling Shares in the secondary market. This difference in bid and ask prices is often referred to as the “bid-ask spread.”

When available, information regarding the Fund’s NAV, market price, how often Shares traded on the Exchange at a premium or discount, and bid-ask spreads can be found on the Fund’s website at [www.sonicshares.com](http://www.sonicshares.com).

## **Tax Information**

Fund distributions are generally taxable as ordinary income, qualified dividend income, or capital gains (or a combination), unless an investment is in an individual retirement account (“IRA”) or other tax-advantaged account. Distributions on investments made through tax-deferred arrangements may be taxed later upon withdrawal of assets from those accounts.

## **Financial Intermediary Compensation**

If you purchase Shares through a broker-dealer or other financial intermediary (such as a bank) (an “Intermediary”), the Adviser or its affiliates may pay Intermediaries for certain activities related to the Fund, including participation in activities that are designed to make Intermediaries more knowledgeable about exchange-traded products, including the Fund, or for other activities, such as marketing, educational training, or other initiatives related to the sale or promotion of Shares. These payments may create a conflict of interest by influencing the Intermediary and your salesperson to recommend the Fund over another investment. Any such arrangements do not result in increased Fund expenses. Ask your salesperson or visit the Intermediary’s website for more information.

## **ADDITIONAL INFORMATION ABOUT THE FUND**

### **Investment Objective**

The SonicShares™ Airlines, Hotels, Cruise Lines ETF (the “Fund”) seeks to track the performance, before fees and expenses, of the Solactive Airlines, Hotels, Cruise Lines Index (the “Index”).

An investment objective is fundamental if it cannot be changed without the consent of the holders of a majority of the outstanding Shares. The Fund’s investment objective has not been adopted as a fundamental investment policy and therefore may be changed without the consent of the Fund’s shareholders upon approval by the Board of Trustees (the “Board”) of Tidal ETF Trust (the “Trust”) and written notice to shareholders.

### **Principal Investment Strategies**

The following information is in addition to, and should be read along with, the description of the Fund’s principal investment strategies in the section titled “Fund Summary-Principal Investment Strategies” above.

The Fund tracks an Index that is calculated by the Index Provider, an independent third party calculation agent that is not affiliated with the Fund, the Adviser, the Fund’s distributor, or any of their affiliates. The Index is not sponsored, promoted, sold or supported in any other manner by the Index Provider, nor does the Index Provider offer any express or implicit guarantee or assurance either with regard to the results of using the Index and/or Index trade mark, or the price of the Index at any time or in any other respect. The Index is calculated and published by the Index Provider. The Index Provider uses its best efforts to ensure that the Index is calculated correctly. Notwithstanding its obligations under an index license agreement with the Adviser, the Index Provider has no obligation to point out errors in an Index to third parties, including, but not limited to, investors and/or financial intermediaries of the Index. Neither publication of the Index nor the licensing of the Index or their trade marks by the Index Provider for the purpose of use in connection with the Index constitutes a recommendation by the Index Provider to invest capital in any of the Index, nor does it in any way represent an assurance or opinion of the Index Provider with regard to an investment in any of the Index.

The Fund will concentrate its investments in a particular industry or group of industries (i.e., hold more than 25% of its total assets in the securities of a particular industry or group of related industries), to approximately the same extent as the Index is so concentrated.

### **Trademark Licenses/Disclaimers**

“SonicShares” mark and the SonicShares logo are trademarks of Lucania Investments LLC (the “Licensor”) and have been licensed to the Adviser in connection with the Fund. The granting of a license of rights relating to such trademarks for the utilization in connection with the Fund does not represent a recommendation by the Licensor or any of its affiliates for a capital investment in the Fund or contains in any manner a warranty or opinion by the Licensor or any of its affiliates with respect to the Index or the attractiveness of an investment in the Fund. The Fund is not sold by the Licensor or any of its affiliates. The Licensor and its affiliates make no representation, condition or warranty, express or implied, to the owners of the Fund or any member of the public regarding the advisability of investing in securities generally or in the Fund particularly.

The Licensor and its affiliates are not affiliated with the Adviser, any sub-adviser, the Index Provider, the Trust, the Fund’s administrator, custodian, transfer agent, distributor, or any of their respective affiliates. The Licensor and its affiliates have no role in the administration or operation of the Fund, nor do they make investment decisions, provide investment advice, or otherwise act in the capacity of an investment adviser to the Fund. The Licensor and its affiliates are not responsible for and do not participate in the determination of the timing of, prices at, or quantities of the Fund to be sold or in the determination or calculation of the equation by which the Fund is to be converted into cash. The Licensor and its affiliates have no role in the administration or operation of the Index, nor in determining the policies of the Index or in determining, composing or calculating the Index. The Licensor and its affiliates have no obligations or liabilities in connection with the Index or the administration, marketing, or trading of the Fund.

### **Manager of Managers Structure**

Although the Fund is not currently sub-advised, the Fund and the Adviser have received exemptive relief from the SEC permitting the Adviser (subject to certain conditions and the approval of the Board) to change or select new unaffiliated sub-advisers without obtaining shareholder approval. The relief also permits the Adviser to materially amend the terms of agreements with an unaffiliated sub-adviser (including an increase in the fee paid by the Adviser to the unaffiliated sub-adviser (and not paid by the Fund)) or to continue the employment of an unaffiliated sub-adviser after an event that would otherwise cause the automatic termination of services with Board approval, but without shareholder approval. Shareholders

will be notified of any unaffiliated sub-adviser changes. The Adviser has the ultimate responsibility, subject to oversight by the Board, to oversee a sub-adviser and recommend their hiring, termination and replacement.

### **Principal Risks of Investing in the Fund**

There can be no assurance that the Fund will achieve its investment objective. The following information is in addition to, and should be read along with, the description of the Fund's principal investment risks in the section titled "Fund Summary—Principal Investment Risks" above.

The principal risks are presented in alphabetical order to facilitate finding particular risks and comparing them with those of other funds. Each risk summarized below is considered a "principal risk" of investing in the Fund, regardless of the order in which it appears. As with any investment, there is a risk that you could lose all or a portion of your investment in the Fund. Some or all of these risks may adversely affect the Fund's NAV per share, trading price, yield, total return and/or ability to meet its investment objective. The following risks could affect the value of your performance in the Fund:

#### **Airlines, Hotels and Cruise Lines Industry Risks:**

- *Airline Companies Risk.* Airline Companies may be adversely affected by a downturn in economic conditions. Due to the discretionary nature of business and leisure travel spending, coupled with the high debt and cost structure of the airline industry, a downturn in economic conditions of the U.S. economy and economies in other regions of the world that results in decreased demand for air travel may significantly and negatively affect the revenues and profitability of such industry. Airline Companies may also be significantly affected by changes in fuel prices, which may be very volatile. Due to the competitive nature of this industry, such companies may not be able to pass on increased fuel prices to customers by increasing fares. Airline Companies may also be significantly affected by the imposition of tariffs and/or changes in labor relations, insurance costs, and the imposition by the United States or other countries of taxes, tariffs or regulations applicable to airline travel, aircraft manufacturing, or aircraft sales. The trend in the United States has been to deregulate the transportation industry, which could have a favorable long-term effect, but future government decisions could adversely affect companies in this industry. Airline Companies may also be highly dependent on aircraft or related equipment from a small number of suppliers, and consequently, issues affecting the availability, reliability, safety, or longevity of such aircraft or equipment (e.g., the inability of a supplier to meet aircraft demand or the grounding of an aircraft due to safety concerns) may have a significant effect on the operations and profitability of Airline Companies. Airline Companies are subject to various risks that may cause significant losses, which include risks related to uncertainty in travel (due to global, regional or local events), passenger safety, security, and privacy, changing consumer demands, shortages of experienced personnel, consumer perception of risk (for example, due to terrorist attacks, pandemics, and political or social violence), and changing or increased regulations.
- *Hotel Companies Risk.* Hotel Companies may be adversely affected by a downturn in economic conditions. Due to the discretionary nature of hotel spending, coupled with the high debt and cost structure of the hotel and lodging industry, a downturn in economic conditions of the U.S. economy and economies in other regions of the world that results in decreased demand for hotel accommodations may significantly and negatively affect the revenues and profitability of such industry. Hotel Companies may also be significantly affected by changes in labor relations, insurance costs, and the imposition of taxes, tariffs or regulations applicable to hospitality services and the purchase or sale of hotels or real estate. Companies in the hotel and lodging industry are subject to various risks that may cause significant losses, which includes risks related to uncertainty in travel (due to global, regional or local events), guest safety, security, and privacy, changing consumer demands, shortages of experienced personnel, consumer perception of risk (for example, due to terrorist attacks, pandemics, and political or social violence), and changing or increased regulations.
- *Cruise Line Companies Risk.* Cruise Line Companies may be adversely affected by a downturn in economic conditions. Due to the discretionary nature of leisure travel and cruise spending, coupled with the high debt and cost structure of the cruise line industry, a downturn in economic conditions of the U.S. economy and economies in other regions of the world that results in decreased demand for cruises may significantly and negatively affect the revenues and profitability of such industry. Cruise Line Companies may also be significantly affected by changes in fuel prices, which may be very volatile. Due to the competitive nature of this industry, such companies may not be able to pass on increased fuel prices to customers by increasing fares. Cruise Line Companies may also be significantly affected by changes in labor relations, insurance costs, and the imposition by the United States or other countries of taxes, tariffs or regulations applicable to cruises, ship manufacturing or ship sales. Cruise Line Companies are subject to various risks that may cause significant losses, which includes risks related to uncertainty in travel (due to global, regional or local events), passenger safety, security, and privacy, changing consumer

demands, shortages of experienced personnel, consumer perception of risk (for example, due to terrorist attacks, pandemics, and political or social violence), and changing or increased regulations.

**Concentration Risk.** The Fund's investments will be concentrated in an industry or group of industries to the extent the Fund's Index is so concentrated. In such event, the value of Shares may rise and fall more than the value of shares that invest in securities of companies in a broader range of industries.

**Depository Receipt Risk.** Depository receipts involve risks similar to those associated with investments in foreign securities and certain additional risks. Depository receipts listed on U.S. exchanges are issued by banks or trust companies, and entitle the holder to all dividends and capital gains that are paid out on the underlying foreign shares ("Underlying Shares"). When the Fund invests in depository receipts as a substitute for an investment directly in the Underlying Shares, the Fund is exposed to the risk that the depository receipts may not provide a return that corresponds precisely with that of the Underlying Shares.

**Equity Market Risk.** The equity securities held in the Fund's portfolio may experience sudden, unpredictable drops in value or long periods of decline in value. This may occur because of factors that affect securities markets generally or factors affecting specific issuers, industries, or sectors in which the Fund invests. Common stocks, such as those held by the Fund, are generally exposed to greater risk than other types of securities, such as preferred stock and debt obligations, because common stockholders generally have inferior rights to receive payment from issuers.

#### **ETF Risks.**

- *APs, Market Makers, and Liquidity Providers Concentration Risk.* The Fund has a limited number of financial institutions that may act as APs. In addition, there may be a limited number of market makers and/or liquidity providers in the marketplace. To the extent either of the following events occur, Shares may trade at a material discount to NAV and possibly face delisting: (i) APs exit the business or otherwise become unable to process creation and/or redemption orders and no other APs step forward to perform these services; or (ii) market makers and/or liquidity providers exit the business or significantly reduce their business activities and no other entities step forward to perform their functions.
- *Costs of Buying or Selling Shares.* Investors buying or selling Shares in the secondary market will pay brokerage commissions or other charges imposed by brokers, as determined by that broker. Brokerage commissions are often a fixed amount and may be a significant proportional cost for investors seeking to buy or sell relatively small amounts of Shares. In addition, secondary market investors will also incur the cost of the bid-ask spread. The bid-ask spread varies over time for Shares based on trading volume and market liquidity, and is generally lower if Shares have more trading volume and market liquidity and higher if Shares have little trading volume and market liquidity. Further, a relatively small investor base in the Fund, asset swings in the Fund and/or increased market volatility may cause increased bid-ask spreads. Due to the costs of buying or selling Shares, including bid-ask spreads, frequent trading of Shares may significantly reduce investment results and an investment in Shares may not be advisable for investors who anticipate regularly making small investments.
- *Shares May Trade at Prices Other Than NAV.* As with all ETFs, Shares may be bought and sold in the secondary market at market prices. Although it is expected that the market price of the Shares will approximate the Fund's NAV, there may be times when the market price of Shares is more than the NAV intra-day (premium) or less than the NAV intra-day (discount) due to supply and demand of the Shares or during periods of market volatility. This risk is heightened in times of market volatility or periods of steep market declines. The market price of Shares during the trading day, like the price of any exchange-traded security, includes a "bid-ask" spread charged by the exchange specialist, market makers, or other participants that trade the Shares. In times of severe market disruption, the bid-ask spread can increase significantly. At those times, Shares are most likely to be traded at a discount to NAV, and the discount is likely to be greatest when the price of Shares is falling fastest, which may be the time that you most want to sell your Shares. Because securities held by the Fund may trade on foreign exchanges that are closed when the Fund's primary listing exchange is open, the Fund is likely to experience premiums and discounts greater than those of ETFs holding only domestic securities.
- *Trading.* Although Shares are listed for trading on the Exchange and may be listed or traded on U.S. and non-U.S. stock exchanges other than the Exchange, there can be no assurance that an active trading market for such Shares will develop or be maintained. Trading in Shares may be halted due to market conditions or for reasons that, in the view of the Exchange, make trading in Shares inadvisable. In addition, trading in Shares on the Exchange is subject to trading halts caused by extraordinary market volatility pursuant to Exchange "circuit breaker" rules, which temporarily halt trading on the Exchange when a decline in the S&P 500 during a single day reaches certain thresholds (e.g., 7%, 13%, and 20%). Additional rules applicable to the Exchange may halt trading in Shares when

extraordinary volatility causes sudden, significant swings in the market price of Shares. There can be no assurance that Shares will trade with any volume, or at all, on any stock exchange. In stressed market conditions, the liquidity of Shares may begin to mirror the liquidity of the Fund's underlying portfolio holdings, which can be significantly less liquid than Shares.

**Foreign Securities Risk.** Certain foreign countries may impose exchange control regulations, restrictions on repatriation of profit on investments or of capital invested, local taxes on investments, and restrictions on the ability of issuers of non-U.S. securities to make payments of principal and interest to investors located outside the country, whether from currency blockage or otherwise. In addition, the Fund will be subject to risks associated with adverse political and economic developments in foreign countries, including seizure or nationalization of foreign deposits, the imposition of economic sanctions, different legal systems and laws relating to bankruptcy and creditors' rights, and the potential inability to enforce legal judgments, all of which could cause the Fund to lose money on its investments in non-U.S. securities. The cost of servicing external debt will also generally be adversely affected by rising international interest rates, as many external debt obligations bear interest at rates which are adjusted based upon international interest rates. Because non-U.S. securities may trade on days when Shares are not priced, NAV may change at times when Shares cannot be sold.

Foreign banks and securities depositories at which the Fund holds its foreign securities and cash may be recently organized or new to the foreign custody business and may be subject to only limited or no regulatory oversight. Additionally, many foreign governments do not supervise and regulate stock exchanges, brokers and the sale of securities to the same extent as does the United States and may not have laws to protect investors that are comparable to U.S. securities laws. Settlement and clearance procedures in certain foreign markets may result in delays in payment for or delivery of securities not typically associated with settlement and clearance of U.S. investments.

In recent years, the European financial markets have experienced volatility and adverse trends due to concerns about economic downturns in, or rising government debt levels of, several European countries. These events may spread to other countries in Europe, including countries that do not use the Euro. These events may affect the value and liquidity of certain of the Fund's investments.

**General Market Risk.** Economies and financial markets throughout the world are becoming increasingly interconnected, which increases the likelihood that events or conditions in one country or region will adversely impact markets or issuers in other countries or regions. Securities in the Fund's portfolio may underperform in comparison to securities in the general financial markets, a particular financial market or other asset classes, due to a number of factors, including inflation (or expectations for inflation), interest rates, global demand for particular products or resources, natural disasters or events, pandemic diseases, terrorism, regulatory events, and government controls.

**Index Risk.** The Index may not reflect all companies meeting the Index's eligibility criteria if certain characteristics of a company are not known at the time the Index is composed or reconstituted.

**Market Capitalization Risk.**

- *Large-Capitalization Investing.* The securities of large-capitalization companies may be relatively mature compared to smaller companies and therefore subject to slower growth during times of economic expansion. Large-capitalization companies may also be unable to respond quickly to new competitive challenges, such as changes in technology and consumer tastes.
- *Mid-Capitalization Investing.* The securities of mid-capitalization companies may be more vulnerable to adverse issuer, market, political, or economic developments than securities of large-capitalization companies. The securities of mid-capitalization companies generally trade in lower volumes and are subject to greater and more unpredictable price changes than large-capitalization stocks or the stock market as a whole.
- *Small-Capitalization Investing.* The securities of small-capitalization companies may be more vulnerable to adverse issuer, market, political, or economic developments than securities of large- or mid-capitalization companies. The securities of small-capitalization companies generally trade in lower volumes and are subject to greater and more unpredictable price changes than large- or mid-capitalization stocks or the stock market as a whole. There is typically less publicly available information concerning smaller-capitalization companies than for larger, more established companies.

**New Fund Risk.** The Fund is a recently organized management investment company with no operating history. As a result, prospective investors do not have a track record or history on which to base their investment decisions. There can be no assurance that the Fund will grow to or maintain an economically viable size.

**Non-Diversification Risk.** Because the Fund is “non-diversified,” it may invest a greater percentage of its assets in the securities of a single issuer or a smaller number of issuers than if it was a diversified fund. As a result, a decline in the value of an investment in a single issuer or a smaller number of issuers could cause the Fund’s overall value to decline to a greater degree than if the Fund held a more diversified portfolio. This may increase the Fund’s volatility and have a greater impact on the Fund’s performance.

**Pandemic Risk.** Beginning in the first quarter of 2020, the United States and countries around the world experienced a global pandemic caused by COVID-19, a novel coronavirus. The pandemic resulted in a wide range of social and economic disruptions, including closed borders and reduced or prohibited domestic or international travel. Some sectors of the economy and individual issuers, including Airline Companies, Cruise Line Companies and Hotel Companies, experienced particularly large losses. Travel restrictions imposed in the United States and other countries have resulted in Airline Companies, Cruise Line Companies and Hotel Companies seeing dramatically reduced demand and, consequently, an equally dramatic impact to such companies’ operations and profitability.

**Passive Investment Risk.** The Fund invests in the securities included in, or representative of, its Index regardless of its investment merit. The Fund does not attempt to outperform its Index or take defensive positions in declining markets. As a result, the Fund’s performance may be adversely affected by a general decline in the market segments relating to its Index.

**Recent Market Events Risk.** U.S. and international markets have experienced significant periods of volatility in recent years and months due to a number of economic, political and global macro factors including the impact of COVID-19 as a global pandemic and related public health issues, growth concerns in the U.S. and overseas, uncertainties regarding interest rates, trade tensions, and the threat of tariffs imposed by the U.S. and other countries. In particular, the spread of COVID-19 worldwide has resulted in disruptions to supply chains and customer activity, stress on the global healthcare system, temporary and permanent layoffs in the private sector, and rising unemployment claims, reduced consumer spending, quarantines, cancellations, market declines, the closing of borders, restrictions on travel, changed travel and social behaviors, and widespread concern and uncertainty, all of which may lead to a substantial economic downturn or recession in the U.S. and global economies. The recovery from the effects of COVID-19 is uncertain and may last for an extended period of time. Health crises and related political, social and economic disruptions caused by the spread of COVID-19 may also exacerbate other pre-existing political, social and economic risks in certain countries. These developments as well as other events could result in further market volatility and negatively affect financial asset prices, the liquidity of certain securities and the normal operations of securities exchanges and other markets, despite government efforts to address market disruptions. In addition, the Fund may face challenges with respect to its day-to-day operations if key personnel of the Fund’s Adviser or other service providers are unavailable due to quarantines and restrictions on travel related to COVID-19. As a result, the risk environment remains elevated. The Adviser will monitor developments and seek to manage the Fund in a manner consistent with achieving the Fund’s investment objective, but there can be no assurance that they will be successful in doing so.

**REIT Risk.** A REIT is a company that owns or finances income-producing real estate. Through its investments in REITs, the Fund is subject to the risks of investing in the real estate market, including decreases in property revenues, increases in interest rates, increases in property taxes and operating expenses, legal and regulatory changes, a lack of credit or capital, defaults by borrowers or tenants, environmental problems and natural disasters. REITs are subject to additional risks, including those related to adverse governmental actions; declines in property value and the real estate market; the potential failure to qualify for tax-free pass through of income; and exemption from registration as an investment company. REITs are dependent upon specialized management skills and may invest in relatively few properties, a small geographic area, or a small number of property types. As a result, investments in REITs may be volatile. To the extent the Fund invests in REITs concentrated in specific geographic areas or property types, the Fund may be subject to a greater loss as a result of adverse developments affecting such area or property types. REITs are pooled investment vehicles with their own fees and expenses and the Fund will indirectly bear a proportionate share of those fees and expenses.

**Sector Risk.** The prices of securities of issuers in a particular sector may be more susceptible to fluctuations due to changes in economic or business conditions, government regulations, availability of basic resources or supplies, or other events that affect that sector or industries within the sector more than securities of issuers in other sectors. The value of the Fund’s investments may fluctuate in response to events affecting a particular sector or industry within the sector.

- *Industrials Sector Risk.* Airline Companies are included within the industrials sector. The performance of the Fund could be negatively impacted by events affecting this sector. The industrials sector may be affected by changes in the supply of and demand for products and services, product obsolescence, claims for environmental damage or product liability and general economic conditions, among other factors. Specific industry risks impacting Airline Companies are set forth in “Airline Companies Risk” above.

- *Consumer Discretionary Sector Risk.* Hotel Companies and Cruise Line Companies are included within the consumer discretionary sector. The performance of the Fund could be negatively impacted by events affecting this sector. The success of consumer product manufacturers and retailers (including travel and leisure) is tied closely to the performance of domestic and international economies, interest rates, exchange rates, competition, consumer confidence, changes in demographics and consumer preferences. Companies in the consumer discretionary sector depend heavily on disposable household income and consumer spending, and may be strongly affected by social trends and marketing campaigns. These companies may be subject to severe competition, which may have an adverse impact on their profitability. Specific industry risks impacting Hotel Companies and Cruise Line Companies are set forth in “Hotel Companies Risk” and “Cruise Line Companies Risk” above.

**Third Party Data Risk.** The composition of the Index, and consequently the Fund’s portfolio, is heavily dependent on proprietary Third Party Data. When Third Party Data proves to be incorrect or incomplete, any decisions made in reliance thereon may lead to the inclusion or exclusion of securities from the Index that would have been excluded or included had the Third Party Data been correct and complete. If the composition of the Index reflects such errors, the Fund’s portfolio can also be expected to reflect the errors.

**Tracking Error Risk.** As with all index funds, the performance of the Fund and its Index may differ from each other for a variety of reasons. For example, the Fund incurs operating expenses and portfolio transaction costs not incurred by the Index. In addition, the Fund may not be fully invested in the securities of the Index at all times or may hold securities not included in the Index. The use of sampling techniques may affect the Fund’s ability to achieve close correlation with its Index. The Fund may use a representative sampling strategy to achieve its investment objective, if the Adviser believes it is in the best interests of the Fund, which generally can be expected to produce a greater non-correlation risk.

**Underlying Index Risk.** Neither the Adviser nor the Index Provider is able to guarantee the continuous availability or timeliness of the production of the Index. The calculation and dissemination of Index values may be delayed if the information technology or other facilities of the Index Provider, calculation agent, data providers and/or relevant stock exchange malfunction for any reason. A significant delay may cause trading in shares of the Fund to be suspended. Errors in Index data, computation and/or the construction in accordance with its methodology may occur from time to time and may not be identified and corrected by the Index Provider, calculation agent or other applicable party for a period of time or at all, which may have an adverse impact on the Fund and its shareholders.

## **PORTFOLIO HOLDINGS INFORMATION**

Information about the Fund’s daily portfolio holdings will be available on the Fund’s website at [www.sonicshares.com](http://www.sonicshares.com).

A complete description of the Fund’s policies and procedures with respect to the disclosure of the Fund’s portfolio holdings is available in the Fund’s SAI.

## **MANAGEMENT**

Toroso Investments, LLC, 898 N. Broadway, Suite 2, Massapequa, New York 11758, serves as investment adviser to the Fund and has overall responsibility for the general management and administration of the Fund pursuant to an investment advisory agreement with the Trust, on behalf of the Fund (the “Advisory Agreement”). The Adviser is responsible for determining the securities purchased and sold by the Fund. The Adviser also arranges for sub-advisory, transfer agency, custody, fund administration, and all other related services necessary for the Fund to operate. Toroso is a Delaware limited liability company founded in March 2012 that is dedicated to understanding, researching and managing assets within the expanding ETF universe. As of February 28, 2021, Toroso had assets under management of approximately \$6.8 billion.

For the services it provides to the Fund, the Fund pays the Adviser a unified management fee, which is calculated daily and paid monthly, at an annual rate of 0.75% of the Fund’s average daily net assets. Under the Advisory Agreement, the Adviser has agreed to pay all expenses incurred by the Fund except for interest charges on any borrowings, dividends and other expenses on securities sold short, taxes, brokerage commissions and other expenses incurred in placing orders for the purchase and sale of securities and other investment instruments, acquired fund fees and expenses, accrued deferred tax liability, extraordinary expenses, distribution fees and expenses paid by the Fund under any distribution plan adopted pursuant to Rule 12b-1 under the 1940 Act, and the unified management fee payable to the Adviser (collectively, the “Excluded Expenses”).

A discussion regarding the basis for the Board’s approval of the Fund’s Advisory Agreement will be available in the Fund’s next semi-annual report to shareholders.

## **Portfolio Managers**

The following individuals (each, a “Portfolio Manager”) have served as portfolio managers of the Fund since its inception in 2021. Messrs. Venuto and Ragauss are jointly and primarily responsible for the day-to-day management of the Fund.

*Michael Venuto, Chief Investment Officer for the Adviser*

Mr. Venuto is a co-founder and has been the Chief Investment Officer of the Adviser since 2012. Mr. Venuto is an ETF industry veteran with over a decade of experience in the design and implementation of ETF-based investment strategies. Previously, he was Head of Investments at Global X Funds where he provided portfolio optimization services to institutional clients. Before that, he was Senior Vice President at Horizon Kinetics where his responsibilities included new business development, investment strategy and client and strategic initiatives.

*Charles A. Ragauss, CFA, Portfolio Manager for the Adviser*

Mr. Ragauss serves as Portfolio Manager at the Adviser, having joined the Adviser in September 2020. Through the Adviser, Mr. Ragauss also provides support services to CSat Investment Advisory, L.P., doing business as Exponential ETFs (“Exponential”). Mr. Ragauss previously served as Chief Operating Officer and in other roles at Exponential from April 2016 to September 2020. Previously, Mr. Ragauss was Assistant Vice President at Huntington National Bank (“Huntington”), where he was Product Manager for the Huntington Funds and Huntington Strategy Shares ETFs, a combined fund complex of almost \$4 billion in assets under management. At Huntington, he led ETF development bringing to market some of the first actively managed ETFs. Mr. Ragauss joined Huntington in 2010. Mr. Ragauss attended Grand Valley State University where he received his Bachelor of Business Administration in Finance and International Business, as well as a minor in French. He is a member of both the National and West Michigan CFA societies and holds the CFA designation.

The Fund’s SAI provides additional information about each Portfolio Manager’s compensation structure, other accounts that each Portfolio Manager manages, and each Portfolio Manager’s ownership of Shares.

## **HOW TO BUY AND SELL SHARES**

The Fund issues and redeems Shares only in Creation Units at the NAV per share next determined after receipt of an order from an AP. Only APs may acquire Shares directly from the Fund, and only APs may tender their Shares for redemption directly to the Fund, at NAV. APs must be a member or participant of a clearing agency registered with the SEC and must execute a Participant Agreement that has been agreed to by the Distributor (defined below), and that has been accepted by the Fund’s transfer agent, with respect to purchases and redemptions of Creation Units. Once created, Shares trade in the secondary market in quantities less than a Creation Unit.

Most investors buy and sell Shares in secondary market transactions through brokers. Individual Shares are listed for trading on the secondary market on the Exchange and can be bought and sold throughout the trading day like other publicly traded securities.

When buying or selling Shares through a broker, you will incur customary brokerage commissions and charges, and you may pay some or all of the spread between the bid and the offer price in the secondary market on each leg of a round trip (purchase and sale) transaction. In addition, because secondary market transactions occur at market prices, you may pay more than NAV when you buy Shares, and receive less than NAV when you sell those Shares.

## **Book Entry**

Shares are held in book-entry form, which means that no stock certificates are issued. Depository Trust Company (“DTC”) or its nominee is the record owner of all outstanding Shares.

Investors owning Shares are beneficial owners as shown on the records of DTC or its participants. DTC serves as the securities depository for all Shares. DTC’s participants include securities brokers and dealers, banks, trust companies, clearing corporations and other institutions that directly or indirectly maintain a custodial relationship with DTC. As a beneficial owner of Shares, you are not entitled to receive physical delivery of stock certificates or to have Shares registered in your name, and you are not considered a registered owner of Shares. Therefore, to exercise any right as an owner of Shares, you must rely upon the procedures of DTC and its participants. These procedures are the same as those that apply to any other securities that you hold in book-entry or “street name” through your brokerage account.

## **Frequent Purchases and Redemptions of Shares**

The Fund imposes no restrictions on the frequency of purchases and redemptions of Shares. In determining not to approve a written, established policy, the Board evaluated the risks of market timing activities by Fund shareholders. Purchases and redemptions by APs, who are the only parties that may purchase or redeem Shares directly with the Fund, are an essential part of the ETF process and help keep Share trading prices in line with the NAV. As such, the Fund accommodates frequent

purchases and redemptions by APs. However, the Board has also determined that frequent purchases and redemptions for cash may increase tracking error and portfolio transaction costs and may lead to the realization of capital gains. To minimize these potential consequences of frequent purchases and redemptions, the Fund employs fair value pricing and may impose transaction fees on purchases and redemptions of Creation Units to cover the custodial and other costs incurred by the Fund in effecting trades. In addition, the Fund and the Adviser reserve the right to reject any purchase order at any time.

### **Determination of Net Asset Value**

The Fund's NAV is calculated as of the scheduled close of regular trading on the New York Stock Exchange ("NYSE"), generally 4:00 p.m. Eastern Time, each day the NYSE is open for business. The NAV for the Fund is calculated by dividing the Fund's net assets by its Shares outstanding.

In calculating its NAV, the Fund generally values its assets on the basis of market quotations, last sale prices, or estimates of value furnished by a pricing service or brokers who make markets in such instruments. If such information is not available for a security held by the Fund or is determined to be unreliable, the security will be valued at fair value estimates under guidelines established by the Board (as described below).

### **Fair Value Pricing**

The Board has adopted procedures and methodologies to fair value Fund securities whose market prices are not "readily available" or are deemed to be unreliable. For example, such circumstances may arise when: (i) a security has been delisted or has had its trading halted or suspended; (ii) a security's primary pricing source is unable or unwilling to provide a price; (iii) a security's primary trading market is closed during regular market hours; or (iv) a security's value is materially affected by events occurring after the close of the security's primary trading market. Generally, when fair valuing a security, the Fund will take into account all reasonably available information that may be relevant to a particular valuation including, but not limited to, fundamental analytical data regarding the issuer, information relating to the issuer's business, recent trades or offers of the security, general and/or specific market conditions, and the specific facts giving rise to the need to fair value the security. Fair value determinations are made in good faith and in accordance with the fair value methodologies included in the Board-adopted valuation procedures. Due to the subjective and variable nature of fair value pricing, there can be no assurance that the Adviser or a sub-adviser will be able to obtain the fair value assigned to the security upon the sale of such security.

### **Investments by Other Registered Investment Companies in the Fund**

Section 12(d)(1) of the 1940 Act restricts investments by registered investment companies in the securities of other investment companies, including Shares. Registered investment companies are permitted to invest in the Fund beyond the limits set forth in Section 12(d)(1), subject to certain terms and conditions set forth in an SEC exemptive order issued to the Trust or rule under the 1940 Act, including that such investment companies enter into an agreement with the Fund.

### **Delivery of Shareholder Documents – Householding**

Householding is an option available to certain investors of the Fund. Householding is a method of delivery, based on the preference of the individual investor, in which a single copy of certain shareholder documents can be delivered to investors who share the same address, even if their accounts are registered under different names. Householding for the Fund is available through certain broker-dealers. If you are interested in enrolling in householding and receiving a single copy of prospectuses and other shareholder documents, please contact your broker-dealer. If you are currently enrolled in householding and wish to change your householding status, please contact your broker-dealer.

## **DIVIDENDS, DISTRIBUTIONS, AND TAXES**

### **Dividends and Distributions**

The Fund intends to pay out dividends and interest income, if any, quarterly, and distribute any net realized capital gains to its shareholders at least annually.

The Fund will declare and pay income and capital gain distributions, if any, in cash. Distributions in cash may be reinvested automatically in additional whole Shares only if the broker through whom you purchased Shares makes such option available. Your broker is responsible for distributing the income and capital gain distributions to you.

### **Taxes**

The following discussion is a summary of some important U.S. federal income tax considerations generally applicable to investments in the Fund. Your investment in the Fund may have other tax implications. Please consult your tax advisor about the tax consequences of an investment in Shares, including the possible application of foreign, state, and local tax laws.

The Fund intends to qualify each year for treatment as a regulated investment company (a “RIC”) under the Internal Revenue Code of 1986, as amended. If it meets certain minimum distribution requirements, a RIC is not subject to tax at the fund-level on income and gains from investments that are timely distributed to shareholders. However, the Fund’s failure to qualify as a RIC or to meet minimum distribution requirements would result (if certain relief provisions were not available) in fund-level taxation and, consequently, a reduction in income available for distribution to shareholders.

Unless your investment in Shares is made through a tax-exempt entity or tax-advantaged account, such as an IRA plan, you need to be aware of the possible tax consequences when the Fund makes distributions, when you sell your Shares listed on the Exchange, and when you purchase or redeem Creation Units (institutional investors only).

The tax legislation commonly referred to as the Tax Cuts and Jobs Act (the “Tax Act”) made significant changes to the U.S. federal income tax rules for taxation of individuals and corporations, generally effective for taxable years beginning after December 31, 2017. Many of the changes applicable to individuals are temporary and would apply only to taxable years before January 1, 2026. There were only minor changes with respect to the specific rules only applicable to RICs, such as the Fund. The Tax Act, however, also made numerous other changes to the tax rules that may affect shareholders and the Fund. Subsequent legislation has modified certain changes to the U.S. federal income tax rules made by the Tax Act which may, in addition, affect shareholders and the Fund. You are urged to consult with your own tax advisor regarding how this legislation affects your investment in the Fund.

### **Taxes on Distributions**

For federal income tax purposes, distributions of net investment income are generally taxable as ordinary income or qualified dividend income. Taxes on distributions of net capital gains (if any) are determined by how long the Fund owned the investments that generated them, rather than how long a shareholder has owned their Shares. Sales of assets held by the Fund for more than one year generally result in long-term capital gains and losses, and sales of assets held by the Fund for one year or less generally result in short-term capital gains and losses. Distributions of the Fund’s net capital gain (the excess of net long-term capital gains over net short-term capital losses) that are reported by the Fund as capital gain dividends (“Capital Gain Dividends”) will be taxable as long-term capital gains. Distributions of short-term capital gain will generally be taxable as ordinary income. Dividends and distributions are generally taxable to you whether you receive them in cash or reinvest them in additional Shares.

Distributions reported by the Fund as “qualified dividend income” are generally taxed to non-corporate shareholders at rates applicable to long-term capital gains, provided certain holding period and other requirements are met. “Qualified dividend income” generally is income derived from dividends paid by U.S. corporations or certain foreign corporations that are either incorporated in a U.S. possession or eligible for tax benefits under certain U.S. income tax treaties. In addition, dividends that the Fund receives in respect of stock of certain foreign corporations may be qualified dividend income if that stock is readily tradable on an established U.S. securities market. Corporate shareholders may be entitled to a dividends-received deduction for the portion of dividends they receive from the Fund that are attributable to dividends received by the Fund from U.S. corporations, subject to certain limitations.

Shortly after the close of each calendar year, you will be informed of the character of any distributions received from the Fund.

In addition to the federal income tax, certain individuals, trusts, and estates may be subject to a Net Investment Income (“NII”) tax of 3.8%. The NII tax is imposed on the lesser of: (i) a taxpayer’s investment income, net of deductions properly allocable to such income; or (ii) the amount by which such taxpayer’s modified adjusted gross income exceeds certain thresholds (\$250,000 for married individuals filing jointly, \$200,000 for unmarried individuals and \$125,000 for married individuals filing separately). The Fund’s distributions are includable in a shareholder’s investment income for purposes of this NII tax. In addition, any capital gain realized by a shareholder upon a sale or redemption of Fund shares is includable in such shareholder’s investment income for purposes of this NII tax.

In general, your distributions are subject to federal income tax for the year in which they are paid. Certain distributions paid in January, however, may be treated as paid on December 31 of the prior year. Distributions are generally taxable even if they are paid from income or gains earned by the Fund before your investment (and thus were included in the Shares’ NAV when you purchased your Shares).

You may wish to avoid investing in the Fund shortly before a dividend or other distribution, because such a distribution will generally be taxable even though it may economically represent a return of a portion of your investment.

If you are neither a resident nor a citizen of the United States or if you are a foreign entity, distributions (other than Capital Gain Dividends) paid to you by the Fund will generally be subject to a U.S. withholding tax at the rate of 30%, unless a lower treaty rate applies. The Fund may, under certain circumstances, report all or a portion of a dividend as an “interest-related

dividend” or a “short-term capital gain dividend,” which would generally be exempt from this 30% U.S. withholding tax, provided certain other requirements are met.

Under the Foreign Account Tax Compliance Act (“FATCA”), the Fund may be required to withhold a generally nonrefundable 30% tax on (i) distributions of investment company taxable income and (ii) distributions of net capital gain and the gross proceeds of a sale or redemption of Fund shares paid to (A) certain “foreign financial institutions” unless such foreign financial institution agrees to verify, monitor, and report to the Internal Revenue Service (“IRS”) the identity of certain of its account-holders, among other items (or unless such entity is otherwise deemed compliant under the terms of an intergovernmental agreement between the United States and the foreign financial institution’s country of residence), and (B) certain “non-financial foreign entities” unless such entity certifies to the Fund that it does not have any substantial U.S. owners or provides the name, address, and taxpayer identification number of each substantial U.S. owner, among other items. In December 2018, the IRS and Treasury Department released proposed Treasury Regulations that would eliminate FATCA withholding on Fund distributions of net capital gain and the gross proceeds from a sale or redemption of Fund shares. Although taxpayers are entitled to rely on these proposed Treasury Regulations until final Treasury Regulations are issued, these proposed Treasury Regulations have not been finalized, may not be finalized in their proposed form, and are potentially subject to change. This FATCA withholding tax could also affect the Fund’s return on its investments in foreign securities or affect a shareholder’s return if the shareholder holds its Fund shares through a foreign intermediary. You are urged to consult your tax adviser regarding the application of this FATCA withholding tax to your investment in the Fund and the potential certification, compliance, due diligence, reporting, and withholding obligations to which you may become subject in order to avoid this withholding tax.

The Fund (or a financial intermediary, such as a broker, through which a shareholder owns Shares) generally is required to withhold and remit to the U.S. Treasury a percentage of the taxable distributions and sale or redemption proceeds paid to any shareholder who fails to properly furnish a correct taxpayer identification number, who has underreported dividend or interest income, or who fails to certify that they are not subject to such withholding.

#### **Taxes When Shares are Sold on the Exchange**

Any capital gain or loss realized upon a sale of Shares generally is treated as a long-term capital gain or loss if Shares have been held for more than one year and as a short-term capital gain or loss if Shares have been held for one year or less. However, any capital loss on a sale of Shares held for six months or less is treated as long-term capital loss to the extent of Capital Gain Dividends paid with respect to such Shares. Any loss realized on a sale will be disallowed to the extent Shares are acquired, including through reinvestment of dividends, within a 61-day period beginning 30 days before and ending 30 days after the sale of Shares.

#### **Taxes on Purchases and Redemptions of Creation Units**

An AP having the U.S. dollar as its functional currency for U.S. federal income tax purposes who exchanges securities for Creation Units generally recognizes a gain or a loss. The gain or loss will be equal to the difference between the value of the Creation Units at the time of the exchange and the exchanging AP’s aggregate basis in the securities delivered plus the amount of any cash paid for the Creation Units. An AP who exchanges Creation Units for securities will generally recognize a gain or loss equal to the difference between the exchanging AP’s basis in the Creation Units and the aggregate U.S. dollar market value of the securities received, plus any cash received for such Creation Units. The IRS may assert, however, that a loss that is realized upon an exchange of securities for Creation Units may not be currently deducted under the rules governing “wash sales” (for an AP who does not mark-to-market their holdings) or on the basis that there has been no significant change in economic position. Persons exchanging securities should consult their own tax advisor with respect to whether wash sale rules apply and when a loss might be deductible.

Any capital gain or loss realized upon redemption of Creation Units is generally treated as long-term capital gain or loss if Shares comprising the Creation Units have been held for more than one year and as a short-term capital gain or loss if such Shares have been held for one year or less.

The Fund may include a payment of cash in addition to, or in place of, the delivery of a basket of securities upon the redemption of Creation Units. The Fund may sell portfolio securities to obtain the cash needed to distribute redemption proceeds. This may cause the Fund to recognize investment income and/or capital gains or losses that it might not have recognized if it had completely satisfied the redemption in-kind. As a result, the Fund may be less tax efficient if it includes such a cash payment in the proceeds paid upon the redemption of Creation Units.

#### **Foreign Investments by the Fund**

Interest and other income received by the Fund with respect to foreign securities may give rise to withholding and other taxes imposed by foreign countries. Tax treaties or conventions between certain countries and the United States may reduce or

eliminate such taxes. If, as of the close of a taxable year, more than 50% of the value of the Fund's assets consists of certain foreign stock or securities, the Fund will be eligible to elect to "pass through" to investors the amount of certain qualifying foreign income and similar taxes paid by the Fund during that taxable year. This means that investors would be considered to have received as additional income their respective shares of such foreign taxes, but may be entitled to either a corresponding tax deduction in calculating taxable income, or, subject to certain limitations, a credit in calculating federal income tax. If the Fund does not so elect, the Fund will be entitled to claim a deduction for certain foreign taxes incurred by the Fund. The Fund (or its administrative agent) will notify you if it makes such an election and provide you with the information necessary to reflect foreign taxes paid on your income tax return.

*The foregoing discussion summarizes some of the possible consequences under current federal tax law of an investment in the Fund. It is not a substitute for personal tax advice. You also may be subject to foreign, state, and local tax on Fund distributions and sales of Shares. Consult your personal tax advisor about the potential tax consequences of an investment in Shares under all applicable tax laws. For more information, please see the section entitled "Federal Income Taxes" in the SAI.*

## **DISTRIBUTION**

Foreside Fund Services, LLC (the "Distributor"), the Fund's distributor, is a broker-dealer registered with the SEC. The Distributor distributes Creation Units for the Fund on an agency basis and does not maintain a secondary market in Shares. The Distributor has no role in determining the policies of the Fund or the securities that are purchased or sold by the Fund. The Distributor's principal address is Three Canal Plaza, Suite 100, Portland, Maine 04101.

The Board has adopted a Distribution (Rule 12b-1) Plan (the "Plan") pursuant to Rule 12b-1 under the 1940 Act. In accordance with the Plan, the Fund is authorized to pay an amount up to 0.25% of its average daily net assets each year for certain distribution-related activities and shareholder services.

No Rule 12b-1 fees are currently paid by the Fund, and there are no plans to impose these fees. However, in the event Rule 12b-1 fees are charged in the future, because the fees are paid out of Fund assets on an ongoing basis, over time these fees will increase the cost of your investment and may cost you more than certain other types of sales charges.

## **PREMIUM/DISCOUNT INFORMATION**

When available, information regarding how often Shares traded on the Exchange at a price above (i.e., at a premium) or below (i.e., at a discount) the NAV of the Fund can be found on the Fund's website at [www.sonicshares.com](http://www.sonicshares.com).

## **ADDITIONAL NOTICES**

Shares are not sponsored, endorsed, or promoted by the Exchange. The Exchange is not responsible for, nor has it participated in the determination of, the timing, prices, or quantities of Shares to be issued, nor in the determination or calculation of the equation by which Shares are redeemable. The Exchange has no obligation or liability to owners of Shares in connection with the administration, marketing, or trading of Shares.

Without limiting any of the foregoing, in no event shall the Exchange have any liability for any lost profits or indirect, punitive, special, or consequential damages even if notified of the possibility thereof.

The Adviser and the Fund make no representation or warranty, express or implied, to the owners of Shares or any member of the public regarding the advisability of investing in securities generally or in the Fund particularly.

## **FINANCIAL HIGHLIGHTS**

This section would ordinarily include Financial Highlights. The Financial Highlights table is intended to help you understand the Fund's performance for the Fund's periods of operations. Because the Fund has not yet commenced operations as of the date of this Prospectus, no Financial Highlights are shown.
